

ARK NATURALS SEA MOBILITY

Sea Mobility provides joint health from the sea! **70% more glucosamine than the nearest competitor.** 56% of each strip is real meat! Includes: Sea Cucumber (chondroitin), MSM & Glucosamine Perfect for On-The-Go Dogs Real USDA Beef or USDA Chicken jerky strips, super-charged with nutraceuticals that help maximize joint function when joint mobility is critical for your dog's lifestyle.

Amazing taste and ease of use make it America's #1 choice for all active dogs. Mobility enhancement and flexibility improvement are provided with the natural power of Sea Cucumber (chondroitin), MSM and Glucosamine. Sea Mobility is our favorite multi-use product. Amazing doggylicious taste, along with ease of use have made Sea Mobility professional trainer's favorite product for training and behavior modification.

What is unique about Sea Mobility? Ark Naturals has combined real beef (not beef meal) or real chicken (not chicken meal) with wheat protein and energy-charged nutraceuticals including: sea cucumber, MSM (methylsulfonylmethane) and glucosamine HCL to produce a product that supports good joint function. Omega-3 (fish oil) and omega-6 (evening primrose oil) have been added to increase its effectiveness. Studies show that by combining these powerful nutraceuticals you can increase your pet's range of motion, maximize joint mobility, and provide comfort for dogs with symptoms of hip and joint distress.

Sea cucumber is a marine animal (echinoderm) related to the starfish. It is an excellent source of chondroitin sulfate; it is considered more complete than traditional chondroitin sources. Sea cucumber helps to supply and build glycosaminoglycans (GAGS) and collagen, important for healthy joint function.

MSM (methylsulfonylmethane) is a naturally occurring sulfur compound in the body. It is necessary for many important bodily processes - in pets as well as in humans. Unfortunately, most foods contain little, if any. Our bodies must replenish MSM from other sources continually. MSM has a number of beneficial effects, including bone, joint, ligament and connective tissue health.

Glucosamine is the most fundamental building block in the synthesis of sugar-protein molecules including proteoglycans, glycosaminoglycans, glycolipids, and hyaluronate. It plays a major role in the synthesis of collagen, cartilage, bone, skin, and various lubricating fluids in the body. Glucosamine helps to produce synovial fluid critical for the maintenance of joint health, and for the joint's ability to operate with a full range of motion. In cell cultures, glucosamine has been reported to stimulate cartilage synthesis and inhibit its degradation.

Sea Mobility offers exceptional nutritional support for active dogs - working/service dogs, field/hunting dogs, or performance/agility dogs - as well as for Senior dogs.

REMEDIES & SUPPLEMENTS

ARK NATURALS JOINT RESCUE for Dogs & Cats

Ark Naturals Joint "Rescue"® Super Strength Chewable provides support for healthy joint function. 500 mg Glucosamine

Ark's combination of glucosamine, chondroitin, herbs, and antioxidants make this joint product the best in its class. Glucosamine helps to supply and build glycosaminoglycans (GAGS) and collagen necessary to create synovial fluid. Antioxidants and minerals help to protect against free radicals that cause cellular damage. Additionally the antioxidants and minerals in Joint "Rescue"® help to increase the absorption of the glucosamine. . Joint "Rescue"® is an excellent choice for pets with visible morning stiffness, difficulty running and playing as well as stiffness associated with aging.

GENTLE DIGEST for Cats & Dogs

A specially formulated Probiotic. Supports growth of beneficial bacteria for your Pet's digestive system. Includes Prebiotics and Probiotics

Gentle Digest provides a source of beneficial intestinal bacteria and also helps to encourage their growth. Periodic use of antibiotics, as well as natural aging tends to decrease the amount of beneficial bacteria in your pet's digestive system. Beneficial bacterium helps to digest food, absorb nutrients, and eliminate toxic substances. Alleviates occasional gas, diarrhea, and intestinal up set.
