PET TOYS

Bionic Play is what started it all. Its led us to find a revolutionary material that can withstand the aggressive play patterns of most pets. Bionic products have been tested in rescue shelters and day cares around the U.S. for years. By making and destroying countless samples, we know Bionic rubber can hold up to the most aggressive chewers.

By combining our knowledge of designing toys for strength, our scientific expertise in materials that are durable and our world-class manufacturing capabilities, we've been able to create products that stand up to Bionic play!

Molecules of Bionic are three dimensionally inter-woven with each other, creating material Nano-connections that are bionic in strength yet pliable and bouncy. Bionic is engineered and made by a proprietary process, invented to meet the high energy play patterns of pets.

Bionic Rubber® is made from FDA food-grade materials that is 100% recyclable allowing us to create virtually no waste when we manufacture our products. Bionic Rubber® has been rigorously tested to ensure it is safe for your pet and that it does not contain any harmful phthalates, hormones, lead, cadmium, mercury, and natural rubber, Bisphenol A, asbestos or latex.

Beyond the science - Bionic is a substitute for natural objects that dogs have been happily chewing on for millions of years. Bionic Rubber is practical; it floats, is dishwasher safe and will last a long time.

Bionic toys are highly durable and last a long time. However, years of research have taught us that there are roughly 1% of dogs that can still find a way to damage, break and in rare cases, destroy our toys. Always supervise your dog's use of Bionic toys. If your dog breaks or damages any toy, remove it from them immediately.

Its important to select the size of your Bionic toy carefully. Smaller dogs generally have sharper teeth which require a toy to have more puncture resistance; however the toy also needs to be softer since a toy that's too hard could cause harm to the dog's teeth.

Large dogs have much more force (pressure) in their bite but also have teeth with more surface area which can more easily destroy soft toys, which make toys that are a bit harder a better option for ensuring durability.

PET TOYS

BIONIC BALLS

Throw toy against the spine and it bounces normally. When your dog thinks he knows where its going to bounce, throw it against the opening to create an unpredictable bounce that's hours of fun! Ball will float. Fits most chucking/throwing toys - Stuff with peanut butter or treats - Easy to see color

- BI10671** Bionic Ball Small for dogs up to 20 lbs
- BI91728** Bionic Ball Medium for dogs 15-35 lbs
- BI21714** Bionic Ball Large for dogs 30-60 lbs
- BI21713** Bionic Ball Extra Large for dogs 60-90 lbs

BIONIC BONE

Our designers took years perfecting this bone! Careful attention was made to ensure it fits naturally in the curvature of the canine mouth. The ridges across the top give your dog the feeling that they are chewing through the toy – keeping them interested in it for months! Its unique interior shape provides strength for even the most aggressive chewers. The opening on our bone is designed to be the perfect place to put treats, dog bones and peanut butter. When you're dog is done, simply throw the toy in the dishwasher for easy cleaning! Floats

- BI10672** Bionic Bone Small for dogs up to 20 lbs
- BI91729** Bionic Bone Medium for dogs 15-35 lbs
- BI10674** Bionic Bone Large for dogs 30-60 lbs
- BI21712** Bionic Bone Extra Large for dogs 60-90 lbs

BIONIC URBAN STICK

The opening on our Urban Stick is designed to be the perfect place to put treats and peanut butter. When you're dog is done, simply throw the toy in the dishwasher for easy cleaning! The Urban Stick offers a splinter-free design with no sharp edges. It can be used as a throw and fetch toy (weighted ends create a spiral motion), tug toy or chew toy. The contoured ridges create a throwing grip and uneven surface dogs love to chew. Contoured ridges create a throwing grip and uneven surface dogs love to chew The Bionic Urban Stick floats.

- BI10673** Bionic Urban Stick Small for dogs up to 20 lbs
- BI21351** Bionic Urban Stick Medium for dogs 15-35 lbs
- BI21352** Bionic Urban Stick Large for dogs 30-60 lbs
- BI21353** Bionic Urban Stick Extra Large for dogs 60-90 lbs

BIONIC TOSS N' TUG

Because our Bionic Rubber® material floats, this toy is perfect for lakes and pools. Simply toss the toy into the water and your dog can easily chase after it as it floats on the surface. The orange color is designed to easily be seen by dogs (and you) for easy retrieving. The Toss-N-Tug's center has been designed to provide strength to the overall design, while offering dogs several options on where to pick up the toy to bring it back to you. While highly durable, the Bionic Toss-N-Tug is not intended to be used as a chew toy. This toy should be used only with supervision

- BI10675** Bionic Toss N' Tug Mini – 7.2" diameter – 1-35 lbs
- BI91778** Bionic Toss N' Tug Standard – 9" diameter – 15-60 lbs
