

Cranimals™

CRANIMALS is a whole food antioxidant supplement for your dog or cat. CRANIMALS is made from cranberries, red raspberries and blueberries and contain many potent antioxidants - nature's best defense against disease and aging. CRANIMALS is a simple way to add nature's goodness to your pet's kibble or wet food. It is suitable for young, mature and geriatric animals.

All CRANIMALS products begin with high quality food-grade raw ingredients sourced directly from the farm. Their cranberry, red raspberry and blueberry extracts are certified organic in the United States, Canada, and European Union. These ingredients are also BC Kosher certified (in case your pet may be wondering). If you choose certified organic whole food supplements for your pet's health, you also care about our planet's well-being.

USDA Certified Organic – 4.2 oz resealable foil pouch.

CRANIMALS ORIGINAL – CR00001

CRANIMALS Original is made from certified organic cranberries. Cranberries contain proanthocyanidins (PAC's) which inhibit the adhesion of Escherichia coli, the bacteria responsible for 80-90% of urinary tract infections. CRANIMALS Original is especially suited for animals with poor kidney function or urinary tract problems. PAC's may support dental health by discouraging the growth of plaque on teeth and gums. The phytochemicals found in cranberries are also anti-angiogenic, anti-inflammatory, anti-bacterial, anti-viral and antioxidant.

CRANIMALS VERY BERRY – CR00002

CRANIMALS Very Berry is made from certified organic blueberries, cranberries, and red raspberries, three of the world's healthiest fruits. Scientific studies show that the polyphenols in these berries have anti-angiogenic, anti-inflammatory, anti-bacterial, and anti-viral properties. Anthocyanidins found in cranberries and blueberries naturally support urinary tract and oral health in companion animals. Red raspberries are particularly enriched in ellagitannins, compounds demonstrated to destroy various cancer cells. CRANIMALS Very Berry delivers a synergistic combination of antioxidants, to help mop up harmful oxidants called free radicals, which damage cells, tissues and arteries, leading to chronic disease.

CRANIMALS GOLD – CR00003

CRANIMALS™ GOLD combines our Original cranberry extract with DHA (Docosahexaenoic Acid), a long chain Omega 3 fatty acid extracted from uncontaminated microalgae. Recent studies suggest that DHA is an anti-inflammatory substance important for neurological, skin, brain, eye, and heart health in mammals. DHA Omega 3 is used up by animal metabolism immediately, in contrast to short chain Omega 3 acids (e.g. Alpha Linolenic -acid found in flax oil). In fact, it may take up to 37 grams of short chain fatty acids to make the same amount of DHA found in 1 gram of Cranimals. CRANIMALS™ Gold is also an excellent source of antioxidant beta carotene – for healthy eyes, skin, membranes and immune function; choline - for proper cell signaling, mental acuity and joint health; and anthocyanidins - for urinary tract health. CRANIMALS™ Gold packs a powerful punch!

CRANIMALS VIBE – CR00006

Cranimals™ VIBE is a whole food supplement especially for adult dogs. It provides a nutrient synergy of cranberry and algae derived antioxidants (anthocyanidins, phycocyanin, chlorophyll, beta carotene) and vegetarian DHA Omega 3. Cranimals™ VIBE contains spirulina, a green algal superfood that has shown potential to help limit muscle damage during heavy exercise, while DHA Omega 3 may also help increase oxygen delivery and energy utilization. Cranimals™ VIBE helps also to support kidney, liver, brain, eye and skin health through detoxification while working to mitigate inflammatory damage.
