

ADVANCED CETYL M JOINT ACTION FOR DOGS

Give your dog a helping hand with the industry's only joint health formula that comes with a dual source of cetyl myristoleate; a powerful esterified fatty acid with astonishing joint health properties. Cetyl M Joint Action Formula for Dogs is uniquely designed and formulated in tablet form to support and sustain joint health and function in dogs. Used as recommended, this formula may also help ease the aches and discomfort that can occur from heavy activity, training and competition. Tasty chewable liver and beef flavor. Dogs love them!

Cetyl M joint Action Formula for Dogs is scientifically designed with myristoleate and a powerful combination of glucosamine-HCL and other joint health ingredients. Balanced with all-natural ingredients, each tablet contains the following:

- Cetyl Myristoleate (Tallow Source) 250 mg
- Glucosamine - HCL (Shellfish Source) 250 mg
- Garlic Root (plant source for stiffness) 15 mg
- Bromelain (plant source for inflammation) 10 mg
- Other Ingredients: Dried Whey, Lipase, Magnesium Stearate, Microcrystalline Cellulose, Natural Liver and Roast Beef Flavor, Silicon Dioxide

RP41120 Cetyl M for Dogs 120 capsules
RP41360 Cetyl M for Dogs 360 capsules

ADVANCED CETYL M JOINT ACTION FOR HORSES

Advanced Cetyl M Joint Action Formula for Horses is a powerful 5-way joint action formula that helps to relieve pain and inflammation, promote joint recovery, enhance motion and flexibility, lubricate joint structures and benefit immune response to joint problems. For active and older horses. Older horses supplement longer.

Advanced Cetyl M for Horses is scientifically designed with the industry's only 100% plant-derived source of cetyl myristoleate and a powerful combination of joint healthy ingredients. Now enhanced with 22% more cetyl myristoleate. A two-scoop dose (77 grams) contains the following:

- Cetyl Myristoleate (100% Kombo Nut Source) 5500 mg
- Glucosamine - HCL (Shellfish Source) 3000 mg
- MSM (Methyl Sulfonyl Methane) 3000 mg
- Ascorbic Acid (Vitamin C) 1000 mg
- Lecithin 340 mg
- Citrus Bioflavonoids 75 mg
- Other Ingredients: Alfalfa Leaf, Calcium Monophosphate, Copper Sulfate, Dried Molasses, dl Methionine, Natural Flavors, Sodium Selenite, Tocopheryl Acetate (Vitamin E) and Zinc Sulfate

RP31463 Advanced Cetyl M Granules for Horses 5.1 lbs 15 to 60 day supply
RP31010 Advanced Cetyl M Granules for Horses 11.2 lbs 32 to 130 day supply
RP31204 Advanced Cetyl M Granules for Horses 22.4 lbs 100 to 260 day supply

ADVANCED CETYL M JOINT ACTION FOR LIVESTOCK (Cattle – Sheep – Goats – Pigs)

Joint Supplement: Cetyl M® Features the industry's finest non-bovine source cetyl myristoleate.

Suitable for the following classes of livestock: Cattle, Sheep, Goats and Pigs

Proven in the Ring. The same winning formula you've known for years, only better with more cetyl myristoleate, select vitamins and more for superior mobility, hair growth and sheen.

Powerful Omega 5 Fatty Acid. 100% plant- derived cetyl myristoleate for overall health, mobility and stride- and more of it!

Competitive Edge. This product is uniquely designed and formulated to support and sustain joint health and function in livestock—and may help ease the aches and discomfort that can occur from heavy exercise, training and competition.

Superior Palatability using Alfalfa, molasses and anise flavoring to ensure intake.

Ingredients: Dehydrated Alfalfa Meal, Rice Bran, Fatty Acids from African Kombo Nut (source of Cetyl Myristoleate), Dried Molasses, Calcium Monophosphate, Vitamin E, Vitamin A, Calcium Carbonate, Anise Flavor Vitamin D3.

Guaranteed Analysis per 4 oz Scoop: Protein (min) 11.7% - Fat (min) 8.9% - Fiber (max) 19.0%

Cetyl Myristoleate (100% Kombo Nut Source) 5500 mg

Calcium (min) 0.75% to (max) 1.25%

Phosphorous (min) 0.75% to (max) 1.25%

Zinc (min) 25.56 ppm

Vitamin A (min) 125,000 IU

Vitamin D (min) 65,000 IU

Vitamin E (min) 300 IU

ADVANCED CETYL M JOINT ACTION CREAM FOR HORSES

This powerful joint action cream is uniquely designed and formulated to support joint and muscle health and function in horses and may help ease the aches and discomfort that can occur from heavy exercise, training and competition.

Advanced Formula: Scientifically designed with cetyl myristoleate and a powerful combination of other joint health ingredients, including hyaluronic acid, aloe barbadensis leaf juice, sunflower seed oil, behentrimonium methosulfate, dimethicone, spearmint leaf oil, menthol, phenoxyethanol and chlorphenesin.

Directions: Apply liberally to the joint surface and surrounding tissues twice daily, once in the morning and once in the evening. Massage the area until the joint action cream has been absorbed.

RP27008 Joint Action Cream for Horses 8 oz

SILICON ADVANTAGE ORAL HORSE SUPPLEMENT ESPECIALLY GOOD FOR COLTS DURING DEVELOPEMENT

Functional Benefits of Silicon Advantage™:

Supports healthy collagen matrix formation for superior cartilage, bone development and remodeling in horses of all ages—and all levels of activity.

Provides a highly bio-available (hydrated) form of silicon for optimum utilization and absorption in horses. Most forms of silicon are not readily bio-available and simply pass through the horse with little if any beneficial effects. That's not the case with Silicon Advantage™.

Supports the development of strong, healthy bone and connective tissue in young, growing horses. While bones continue to form and re-form throughout the life of the horse, silicon is absolutely essential during the horse's formative years to help minimize the risk of structural issues in later stages.

Supports healthy hoof development and function. Silicon Advantage™ also supports healthy hair coat and skin condition.

Provides powerful anti-oxidant benefits for healthy metabolic function and immune system function.

Directions: Administer 2.5 ml per day (1/2 tsp) orally for a 1,100 lb horse or 0.5 ml per 220 lb of bodyweight per day. Silicon Advantage™ can be administered orally with a syringe or it can be applied directly to feed.

RP32500 Silicon Advantage Oral Horse Supplement 250ml

CM CETYL M JOINT ACTION FOR PEOPLE

CM Response Joint Action Formula is uniquely designed to support and sustain joint and muscle health in people of all ages and activity levels. Used as recommended, this powerful joint action formula nourishes joint cartilage, supports flexibility and may ease the aching and discomfort that can occur from activity and training.

CM Response formula is scientifically designed with cetyl myristoleate and balanced with a power combination of other joint health ingredients.

Directions: Take 3 capsules twice daily until desired result has been achieved (approximately 2-3 weeks). Gradually reduce the daily intake until an effective maintenance dose has been determined. This may vary for individuals depending on a number of variables; including body weight, age, activity levels and joint condition. Always refer to the information on the product label before using.

Ingredients: Cetyl Myristoleate Fatty Acid Complex 1500 mg – Glucosamine-HCL (Non-Shellfish Source) 750 mg – MSN (Methyl Sulfonyl Methane) 300 mg – Hyaluronic Acid 10 mg – **Other Ingredients:** Gelatin Capsule, Magnesium Stearate, and Silicon Dioxide

Does not contain: Sugar, Salt, Starch, Yeast, Wheat, Gluten, Milk or Egg

The Story of Cetyl Myristoleate

Cetyl myristoleate and its unique joint health properties were first discovered by Dr. Harry Diehl, a research chemist at the National Institute of Health (NIH). It was during his research that Diehl discovered a family of Swiss albino mice with remarkably healthy joints and surprising resistance to joint stress. He theorized that the mice carried a special trait and, ultimately discovered the secret – their unique ability to synthesize cetyl myristoleate.

In 1998 Dori and Gary Simonton of Response Products began a similar quest for joint health in people and their companion animals, most notably dogs and horses. Building on Diehl's groundbreaking work with cetyl myristoleate, at long last they developed a new and better way to support joint health and function for people and their pets.

Today companion animals can enjoy the benefits of cetyl myristoleate in a unique family of innovative joint action formulas specially design for dogs and horses. This terrific story of joint health is playing out every day for tens of thousands of dogs, horses and people around the world. And to think it all started with a mouse!

In addition to cetyl myristoleate, Dr. Harry Diehl also isolated more than 500 other first-time compounds and is widely recognized for discovering a method for synthesizing the unique sugar form used in preparing Dr. Jonas Salk's oral polio vaccine.

UNIQUE MOLECULAR STRUCTURE MAKES THE DIFFERENCE!

Cetyl Myristoleate is a unique esterified fatty acid derived from myristoleic acid. Most animals, including people, dogs and horses cannot make cetyl myristoleate on their own. To benefit from its unique joint health properties, it must be synthesized from myristoleic acid and administered orally or as a topical cream. In its raw, pre-synthesized form, cetyl myristoleate is found only in African Kombo Nut Butter, whale fat and beef tallow.
